DART CD-Recorder
Rip and Burn software

DART CD-Recorder Basic. The fastest way to capture and record quality music for custom CD's. Now, rip and burn CD+G!

Make Custom Karaoke for Karaoke Machines

The software suite with everything you need to make custom Karaoke for CD+G Karaoke machines!*

Use Today's Newest Tunes or Oldies You Love — Even Other CD+G Discs! Record music from records, tapes, CDs or Internet MP3.

Import or Type-In Lyrics Use the original lyrics or type them as you play the track. Colorize the lyrics and background. Add leading graphics.

Synchronize Lyrics To the Music Line-up the words with the music. It's easy. The lyrics show up to guide you through a song.

Sing-Along or Record Your Performance Have fun solo or with friends. Select your songs and play Karaoke. To record your performance, click the red button and sing along.

Now, DeVocalize DART Karaoke Studio's DeVocalizer™ makes the main vocal virtually disappear. The vocal performance of most stereo recordings is removed or reduced to a whisper, just enough to guide your singing.

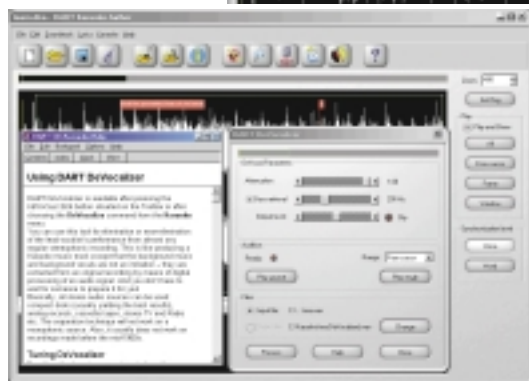

Remix: Add Your Performance To the Track Want to hear how you sound with that music? Mix your recorded singing with your favorite track. You may mix your voice with the original artist or the DeVocalized™ recording. It's your choice. Save the mix on your hard drive or burn your own CD.

Make Custom Karaoke CD Discs DART CD-Recorder is the easiest to use Rip and Burn Software. Special version records CD+G. Make discs for your Karaoke machine.

* A CD+G compatible CD-R device is required. Visit www.DARTPro.com for a current list.

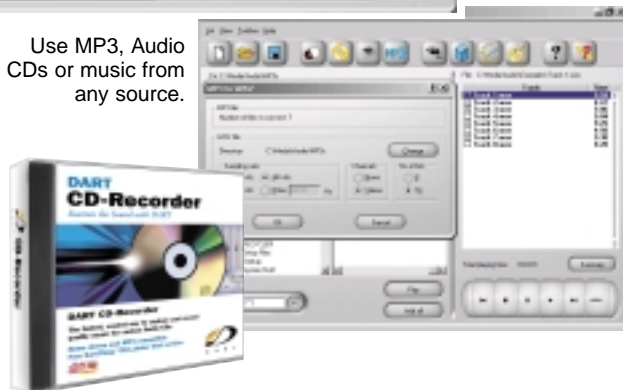

Pop-up guide makes Karaoke easy

Help Screens for every step. DeVocalizer removes vocal performance from most commercial recordings.

Use MP3, Audio CDs or music from any source.
